EDUCATION

PDP UNIVERSITY

Tashkent

B.S. in Software Engineering/Pearson BTEC Higher Nationals

2024 - 2028

HotelOS — *Hotel Management Platform* — ASP.NET, PostgreSQL, SignalR, RabbitMQ, Next.js, Tailwind

- Designed for full hotel operations management, including room reservations, room service order tracking, housekeeping, maintenance and kitchen coordination across role-based staff dashboards.
- Eight independent microservices communicating exclusively via RabbitMQ event broker; Ocelot API Gateway as single entry point; JWT authentication with role-based authorization across roles
- Atomic race condition prevention on room reservations; real-time room status and order updates via SignalR WebSockets; background reservation expiry worker; Stripe payment integration

WEPRO DIGITAL PROFESSIONS SCHOOL

Samarkand

Certification in FrontEnd Development

December 2023 - June 2024

- Completed an intensive, 7-month practical training program focused on modern web development.
- Mastered core frontend technologies, semantic HTML5, CSS3/SASS, and JavaScript fundamentals.
- Developed an understanding of version control (Git/GitHub) and collaborative development workflows early in my engineering path.

WORK EXPERIENCE

BIGIT

Tashkent

Software Developer - FrontEnd

March 2025 - September 2025

- Collaborated closely within an agile 5-member production team to deliver scalable user interfaces under rigorous production deadlines.
- Developed core frontend features, ensuring clean code architecture, optimal performance, and seamless integration with backend APIs.
- Troubleshoot UI bugs and optimized frontend asset rendering, resulting in improved user experience and reduced loading times across the application.

PDP UNIVERSITY

Tashkent

Mentor assistant - FullStack

November 2024 - June 2025

- Mentored 15+ students through an individualized approach, guiding them to independently build and deploy their projects.
- Organized deep-dive sessions on core JavaScript mechanics, ensuring foundational understanding of behind-the-scenes concepts, including execution contexts, the call stack, and the event loop.
- Guided students through practical assignments in web development and full-stack development, dramatically reducing code errors and encouraging self-sufficient problem-solving habits.
- Formulated structured code samples, reviewed mini-projects, and provided targeted technical feedback.

SKILLS & INTERESTS

Technical Skills:

- **Backend Development:** C# / ASP.NET Core, Node.js, Python (not core stack), C++ (not core stack)
- **Databases:** PostgreSQL, MySQL, MongoDB, Entity Framework
- **System Design:** HLD / LLD, Microservices Architecture, Clean Architecture
- **Real-time Systems:** SignalR, WebSocket
- **Frontend:** Next.js, React, TypeScript, Tailwind, Responsive Design, CSS, HTML5
- **DevOps & Version Control:** GitHub Actions, Cloud (AWS/Azure) & Deployment, Git, GitHub
- **Modeling:** UML/ERD Modeling, SDLC, Software Engineering (HLD/LLD)
- **Project Management:** Notion, Jira, Trello

Soft Skills: Teamwork, Continuous Learning, Deadline and Time Management, Adaptability.

General Technical Skills: Microsoft Office, Google Workspace, Prompt Engineering, Canva.

Languages:

- Uzbek (Native)
- Russian (B1 — technical documentation and independent development)
- English (B2 — IELTS 6.5)

Personal Interests:

- Solving algorithmic problems on LeetCode
- Building mini-ERP and CRM systems for real-world problems
- Exploring cybersecurity concepts and puzzle culture (CTF-style challenges)
- Mentoring junior developers and organizing mini-hackathons
- Reading (technology, personal development, sci-fi)
- Writing technical blogs and project documentation
- Forex trading
